Subject: [External] National Hazardous Waste Combustion Conference Call

EPA HQ is trying to resurrect the subject call. There was a call earlier today. One of the topic areas involved the issue below. Regarding the highlighted area, EPA Headquarters would appreciate any information you might have regarding other facilities that meet the criteria described below and that are not included on the list below.

- (1) Please send any additional facilities to Mike Galbraith in HQ at galbraith.michael@epa.gov. Also,
- (2) If you are not already on the group list for this call and would like to be, let me know, and I'll pass your name on to HQ. Or you can contact Frank Behan directly at behan.frank@epa.gov

Thanks

Facilities with Thermal Desorption Units (TDUs) followed by Condensers

Headquarters has been receiving inquiries about facilities that utilize thermal desorption units (TDUs) followed by condensers to recover, for example, hazardous waste-derived fuels, exempt used oil fuel or petroleum refinery inputs, or other exempt products (e.g., degreasers). Below is a list of facilities that we know of that may utilize TDUs and condensers. We would like to know if regions/states know of other facilities that take hazardous waste for processing in TDU's where the volatilized gases are subsequently routed thru condensers to produce some type of product. For purposes of this inquiry, it does not matter if the TDU's/condensers or subsequent pollution control equipment were determined to need a RCRA treatment permit.

- TDX/US Ecology (Robstown, TX)

- Rineco - closed - (Benton, AK)
- Chemical Waste Management (Oregon)
- Chemical Waste Management (Sulphur, LA)
- Clean Harbors (Region 6?)
- Thermaldyne (LA)
- Tradebe (East Chicago)
- Elcon Recycling (PA)
- Philips66 (exempt per 40 CFR 261.4(a)(12)(i) ? - Region 6)
- Marathon (exempt per 40 CFR 261.4(a)(12)(i) ? -Region 6)
- Shell (exempt per 40 CFR 261.4(a)(12)(i) ? - Region 6)
